Education

University of Nigeria, BS in Computer and Robotics Education

Nov, 2023

Technologies & Technical Skills

Frontend: JavaScript, TypeScript, React.js, Next.js, HTML, CSS, SCSS, Tailwind CSS, Bootstrap, Progressive Web Apps, Styled Components, Shadcn UI

Backend: Nodejs, Express.js, Supabase, MongoDB, Solidity

Version control: Git & Github

Testing: Unit testing

Analytics & Tracking: Posthog

Project management tools: Kanboard, Zoho and SCRUM methodologies

Web3 Specialized skills: Smart contract auditing, Alchemy SDK, Moralis SDK, Viem, Ethers.js, web3.js, Coinbase SDK, AA Accounts integration

Experience

Web3 Engineer, Jamit – Lagos, Nigeria (Remote)

June 2023 - May 2026

- Developed a streamlined podcast distribution system that enabled seamless creator onboarding from major platforms including Spotify and Apple Podcasts, resulting in a 75% increase in user acquisition
- Architected and developed a comprehensive Studio booking system (**Studio Campus**) that enables users to check availability, reserve studio rooms through an integrated calendar, and process payments online via Stripe and Pystack resulting to 30% increase in revenue
- Built a production-ready advertising campaign network platform that allows users to create and purchase ad placements, while developing the core ad injection algorithm to optimize content delivery.
- Conducted comprehensive security audits and refactored five critical smart contracts including Jamit Coin, Headphones Factory NFT, RadioNova NFT, Podcast Factory, and Jams contracts, resulting in a 98% reduction in security vulnerabilities while maintaining 95% system performance.
- Developed **Backstage**, a comprehensive analytics dashboard that provides real-time visibility into company performance metrics including revenue tracking, user engagement, podcast analytics, and listening patterns. This custom solution eliminated the need for third-party analytics tools, saving the company \$12,000 annually while providing actionable business insights for strategic decision making.

Frontend Engineer, Light Brain – Yaoundé, Cameroon (Remote)

June 2024 – April 2026

- Led frontend architecture and implementation for two concurrent production systems—the International Student Housing Platform (China) and the Urban Disorder Monitoring System—contributing to a 40% improvement in delivery efficiency while maintaining a 99.2% quality benchmark.
- Played a key technical role in the Urban Disorder Monitoring System demo and presentations to international vendors and government stakeholders by developing interactive UI flows and data visualizations, supporting the successful acquisition of a \$120,000 government contract with The Gambia.
- Collaborated asynchronously with cross-functional teams (designers, backend engineers, and stakeholders), improving development workflow efficiency by 45% through clear interface contracts, component reuse, and

frontend documentation.

Mid-Level Product Engineer, Deveote – Lagos, Nigeria (Remote)

March 2025 - Present

- Drove frontend development for Nestrova, a cutting-edge talent-employer matching platform (focused on African tech talent), enabling job seekers to build reusable, standardized profiles and employers to access AI-driven shortlisting and vetted candidates.
- Contributed to the successful launch and iteration of Duerents as a key project under Deveote's venture-building model, helping transform client ideas into scalable, market-ready web applications tailored to Nigeria's real estate challenges.
- Built intuitive, high-performance features for Nestrova, such as profile creation with auto-fill capabilities, real-time application tracking, structured skill/experience/portfolio sections, employer dashboards for job posting and candidate review, and transparent shortlisting workflows, significantly streamlining the hiring process from weeks to hours.
- Achieved key milestones including successful deployment of feature-rich MVPs, positive stakeholder feedback on UX improvements, and contributions to Deveote's portfolio of high-potential startups in real estate tech and talent marketplaces.
- Built and launched a 3-interfaced (Student, Teacher and Admin) language learning platform (Àwùj) supporting live one-on-one and group Yoruba instruction, serving learners across 3 continents.

Projects

Briv Bank

<https://brivbank.com>

Role: FullStack Engineer

- Developed a comprehensive online banking application enabling users to create accounts and apply for financial services, featuring an integrated analytics dashboard for real-time expense monitoring and financial insights.

Technologies

Next.js 15 • React 19 • TypeScript • MongoDB • Tailwind CSS • shadcn/ui • TanStack Query • Framer Motion
• Cloudinary • Resend

Revlot

<https://revlot.co>

Role: Frontend Engineer

Technologies

Next.js 15 • React 19 • TypeScript • Tailwind CSS 4 • Radix UI • shadcn/ui • Lucide React • React Icons • ESLint
• Turbopack

Jamit Web App — *Next.js frontend for the Jamit audio content and creator platform (streaming, payments, creator tools).*

<https://jamit.app>

Role: Web3 Engineer

Technologies used

Next.js 15 • React 19 • TypeScript • Tailwind CSS 4 • Radix UI • shadcn/ui • Lucide React • React Icons • ESLint
• Turbopack

Jamit Studio — *Creator CMS for an AI-powered social audio platform (podcasts, audiobooks, series)*

<https://studio.jamit.app>

Role: Web3 Engineer

Technologies

Next.js 15 • React 19 • TypeScript • Tailwind CSS 4 • Radix UI • shadcn/ui • Lucide React • React Icons • ESLint • Turbopack • Ethers.js • Alchemy SDK • Account Abstraction (AA) SDKs • Moralis • Biconomy • Viem

Jamit My Account — *Full-featured account management system with OAuth authentication, identity verification, and multi-language support for Jamit users.*

<https://my.jamit.app>

Role: Web3 Engineer

Technologies

Next.js 15 • React 19 • TypeScript • Tailwind CSS 4 • Headless UI • Zustand • TanStack React Query • Zod • OAuth • Stripe Identity • next-intl • ESLint • AWS CodeBuild • Viem • Ethers.js • Alchemy SDK • Account Abstraction (AA) SDKs • Moralis • Biconomy

Nestrovar User App — *User-facing web app for a hiring/recruitment platform (job browsing, applications, profile, settings, auth).*

<https://nestrovar.deveote.com>

Role: Lead Frontend Engineer

Technologies

Next.js 15 • React 19 • TypeScript • Tailwind CSS 4 • Headless UI • Zustand • TanStack React Query • Zod • OAuth • Stripe Identity • next-intl • ESLint • AWS CodeBuild

Duerents App — *Property rental platform frontend for landlords, tenants, and agents*

<https://dev.duerents.com>

Role: Lead Frontend Engineer

Technologies

Next.js 15 • React 19 • TypeScript • Tailwind CSS • TanStack Query • React Hook Form • Zod • Google Maps API • AWS S3 • Paystack

Àwujo — *Àwujo is a structured, culturally immersive online platform for learning the Yoruba language, serving learners across the African diaspora and beyond.*

<https://dev.ourawujo.com>

Role: Lead Frontend Engineer

Technologies

Next.js 15 • React 19 • TypeScript • Tailwind CSS • TanStack Query • React Hook Form • Zod • Google Cloud Storage • Stripe
